FINDINGS / F-001 / REVIEW

# Review possible session conflict

Pending Review

Compare the source requirements and record a reasoned decision before changing the finding status.

R12 **Inactivity logout** v1.4

> The system shall log users out after **5 minutes of inactivity.**

Security requirements · §3.2 · Owner: Priya Shah

R27 **Minimum session duration** v1.4

> The system shall maintain sessions for **at least 30 minutes.**

Session requirements · §4.1 · Owner: Daniel Kim

## AI explanation

High 92% AI confidence

If both requirements describe the same authenticated session, logging out after 5 minutes of inactivity may prevent a session from lasting at least 30 minutes. However, “session” may refer to different layers, or R27 may allow inactivity-based logout.

Possible conflict, not a confirmed contradiction. Clarify the session definition and any inactivity exception before resolving.

## Reviewer notes

Draft · Not submitted

R12 and R27 may use different definitions of session. Confirm whether the 30-minute minimum applies to idle users and whether inactivity logout is an explicit exception.

Notes are recorded with your decision. Accept and Dismiss require a rationale.

Reviewer: Abhijeet · No review decision has been recorded.

## Choose a review action

Your decision owns the outcome. AI confidence alone does not confirm a conflict.

✓ Accept  ✕ Dismiss

Accept: confirm a conflict that still needs a fix. Dismiss: record why this is not a conflict.

Resolve Conflict

Document an agreed requirement change and rationale. Only then mark the finding Resolved.
